# CAPIXAN

## HAIR REGROWTH

### STIMULATES HAIR GROWTH

Capixan has a strong effect of reducing 5- $\alpha$  reductase as a root problem of baldness.

### REDUCES HAIR LOSS

Improves hair anchorage and increases dermal papilla activity.

### UNIQUE COMBINATION

Contains combination of Biochanin A and Acetyl tetrapeptide-3.

### OVER 90% SATISFIED CUSTOMERS

Clinically proven and confirmed by academic tests.

**This problem of hair loss** affects more than 70% of men and more than 40% of women. The hormone dihydrotestosterone (DHT), plays a crucial role. The biologically highly active DHT is formed in the body of men and women by an enzyme (5-alpha reductase) from testosterone. The hair roots are extremely hypersensitive to DHT. DHT shortens the hair growth phase. Hair fall faster, get thinner and disappear.

## CAPIXAN IS A UNIQUE ANTI-HAIR LOSS COMBINATION

### Biochanin A

Biochanin A extracted from Red clover is an effective inhibitor of 5- $\alpha$  reductase (type I and II) activity, thus modulating the conversion of testosterone to DHT in androgenic alopecia.

### Acetyl tetrapeptide-3

4 amino acids biomimetic peptide derived from a signal peptide which stimulates tissue remodeling. The peptide has a direct effect on hair follicle. The remodeling signal will increase the size of hair follicle for better hair anchoring and vitality.

**LOTION 5%, 50 ml**  
Capixyl™

The main ingredient of Capixan is Capixyl™. This is a combination of two ingredients: Biochanin A and Acetyl tetrapeptide-3. This is an intensive treatment against hair loss in men and women.

**SHAMPOO, 200 ml**

Capixyl™ + Caffeine + Ginseng + Tea tree oil
