ENHANCED PENETRATION OF VITAMINS INTO THE SKIN

The Swiss Energy cosmetic range uses a specially developed basis that includes a combination of high molecular weight hydrophilic and lipophilic components. These components act as conductors of vitamins and active ingredients deep into the skin.

They improve the absorption of vitamins through the upper layer of skin and putting them into skin cells and intercellular matrix. Active ingredients can quickly enter the cellular metabolism and have a quick and noticeable effect on skin condition.

NATURAL COSMETICS WITHOUT LAURETH SULPHATES AND PARABENES

In ordinary cosmetics you can often find substances such as sodium lauryl ether sulfate (SLES) and sodium laureth sulfate (SLS). Researches have shown that these substances can be dangerous and cause irritation effect and dermatitis.

Also often in cosmetics use parabens, which act as preservatives. These chemicals compounds act like estrogens (female hormone). The safety of parabens has been placed under doubt after their detection in high concentration in a breast cancer.

Swiss Energy cosmetic line does not contains laureth sulphates and parabens. **This guarantees high safety level of our products.**

GROWING HERBS OF THE HIGHEST QUALITY!

The beneficial effect of herbs depends a lot on the content of ethereal oils, highly aromatic substances and other organic compounds in them. The strength of the cosmetologically effect is determined primarily by the concentration in the herbs of these substances.

We prefer using only environmentally friendly, 100% natural herbs growing in Alpine region at an altitude of more than 1000 m. **This organic approach to growing herbs allows us to get the highest quality of raw materials for our products.**

This approach for herbs growing allows us to obtain the highest quality of raw materials in our products.

ONLY THE BEST ALPINE MEADOWS!

The quality of the herbs is highly dependent on the soil, location, cultivation method and production technology. We use only the most suitable for growing herbs sunny hillsides in high mountains with crystal clear air and water.

Herbs grows in the mountains slower than herbs in valley for example. This fact contributes to a greater accumulation of essential oils and other useful substances.

Alpine region is famous for the rich minerals in the soil. All these facts allow to grow herbs of excellent quality! The color, taste and flavor of these plants reflect the unique environment of this wonderful mountain world!

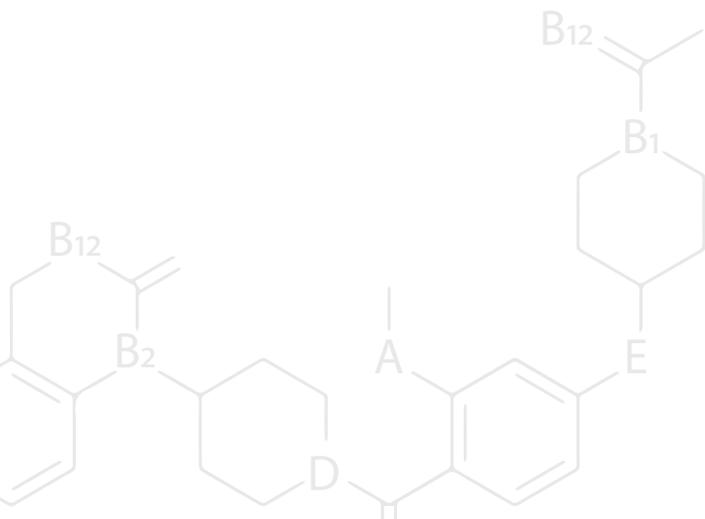

SWISS ENERGY

By Dr. FREI®

OUR MAJOR RAW MATERIAL SUPPLIERS IS MOUNTAIN FARMERS!

We cooperate with local farmers who grow herbs for us in their small fields. **Such sites are often located high in the mountains at an altitude of more than 1000 m and are not suitable for intensive industrial farming.** These areas are an obvious choice for organic farming.

Due to their hard work and special skills, mountain farmers manage to grow wonderful herbs at an altitude of up to 2000 m **without using of any herbicides, insecticides or chemical fertilizers.**
