## MOSQUITOES ARE EVERYWHERE! MOST OF ALL IN ASIA AND SOUTH AMERICA

The presence of mosquitoes around the globe is so wide that they can be found everywhere except the poles. **The largest numbers of these insects exist in Asia and South America.**

Millions of people are bitten every day. In some countries, mosquito bites can transmit diseases such as malaria, Zika, Dengue, yellow fever.

## ITCHING IS A REACTION TO THE PROTEINS IN SALIVA

Everyone is familiar with itching after a mosquito bite. It can be intolerable sometimes. Itching is the body's response to the proteins in insect's saliva. The mosquito injects saliva while the process of sucking blood in order to stop its clotting.

The itching is very persistent and makes you scratch the affected area. **This can worsen the skin condition and can lead to infection.**

# SWISS HERBAL BALMS
